Professional Summary

Software Engineer with 6+ years of experience building web-based systems and solving real business problems through technology. Experienced in full-stack development with a strong focus on backend systems, integrations, and scalable architectures. Comfortable working in remote and asynchronous environments, taking ownership of features end-to-end, and collaborating across teams to deliver impactful and maintainable solutions.

Technical Skills

- Languages: TypeScript, Python
- Backend: Node.js, Nest.js, Express.js
- Frontend: React, Next.js, TailwindCSS
- Database & ORM: PostgreSQL, Prisma, Drizzle
- Cloud & Tools: AWS EC2, AWS S3, GCP Storage, Stripe
- ERP: Odoo

Work Experience

International Centre for Industrial Transformation (INCIT) - Batam, Indonesia (Hybrid)

- November 2024 - present as **Full-stack Developer (Full-time)**
 - Designed and implemented backend APIs using NestJS based on business and product requirements.
 - Led the integration of payment and invoicing systems using Stripe, Google Pay, Apple Pay, and Xero to support end-to-end billing workflows.
 - Integrated cloud storage services (AWS S3 and GCP Storage) for secure and scalable file management.
 - Collaborated asynchronously with cross-functional teams to improve system reliability, scalability, and smooth feature delivery.
- November 2022 - November 2024 as **Front-end Developer (Full-time)**
 - Implemented responsive and user-friendly UI based on design specifications and user feedback.
 - Collaborated closely with backend engineers to integrate APIs and ensure consistent data flow between frontend and backend systems.

Software Engineer (Full-time)

PT. Tigernix Solutions Indonesia - Batam, Indonesia

March 2020 - August 2022 (2 years 6 months)

- Developed and extended core features (Inventory, Students, Session, Admission, etc.) in an ERP system used in production environments.
- Prepared and executed data migration processes prior to production deployment.
- Set up deployment infrastructure on AWS EC2 and implemented automated database and file backups using cron jobs and shell scripts.
- Took responsibility for system stability and operational readiness in live environments.

Substitute Teacher (Part-time)

SMK Multistudi High School - Batam, Indonesia

August 2019 - December 2019 (5 months)

- Delivered teaching materials and assessments for Web and Mobile Development subjects, focusing on programming fundamentals and practical skills.

IT Staff (Internship)

PT. Multi Kreasi Sinergia - Batam, Indonesia

July 2018 - March 2019 (9 months)

- Assisted in operating a makerspace and conducting technical workshops, developing hands-on problem-solving and ownership skills.

- Taught basic programming in a Coding for Kids program, strengthening communication and concept simplification abilities.
- Built early robotics and IoT prototypes, gaining exposure to system thinking and iterative prototyping.

Education

Batam State Polytechnic

Diploma Degree in Informatics Engineering (GPA: 3.79)

- Active member of **Batam Linux User Group**, focusing on programming and open-source learning
